Denning | easy Lounge Chair - Metal

\$556.00

Description

Our Denning dining chair with metal legs is a reproduction of the classic DCM metal dining chair. It has a slightly lower and has a wider seat and back than the molded plywood dining chair. Sculpted with gentle curves, it gives the hard material a soft, inviting appearance while the molded shape is designed to comfortably fit the body. This chair is made with multi-ply seat and back plates in a natural veneer, and a polished chrome-plated leg base with self-leveling nylon glides and shock mounts to absorb movement.
