## Northcastle Modular Sectional Sofa

\$4,943.00

## Description

Our Newcastle modular sectional sofa takes inspiration from the Divani NeoWall sofa designed by Piero Lissoni, and is composed of modular elements with different dimensions – the width, depth, and armrest heights are available in a range of sizes. It is hand crafted in the United States from a frame of engineered hardwood, nylon elastic webbing, and differentiated density polyurethane foam padding with a quilted goose down mat. The modular units join together with special hooks or a static connection. This sectional is sold as one, 3-piece sofa with either a left or right facing (shown here) chaise, one high narrow armrest, one low wide armrest, and is upholstered in a basic level fabric (pillows are not included). Also available in custom dimensions and configurations, with COM or COL fabrics or a wide selection of upholstery options. If you have a specific requirement for a project, we're happy to help. Please contact one of our professionals to discuss your requirements.
