Antwerp | Jacobsen Armchair

\$388.00

Description

Our Antwerp armchair is inspired by the classic 7 series chair design. Featuring a slim shell with a waterfall seat edge, it is composed of multi-layers of wood veneer that allow a slight flex for comfort, atop a mirror chromed steel base with angled armrest supports. This multi-purpose stackable chair is a popular option for both the dining room or as an office meeting room chair. It is available in four wood veneer finishes as well as other colors painted on beech or, as a custom order, with leather or fabric upholstery on the front only or on the entire chair. Please contact us for assistance with any customization requirements or for more information.
