## Dewitt | easy Shell Chair - Dowel Base

\$193.00

### Description

HONORMILL's DeWitt collection features quality reproductions of the mid-century classic, shell chair design. Available in a wide range of colors, materials, and leg configurations, our DeWitt chairs provide practical seating options for both residential and commercial spaces - from the modern home's dining room or children's bedroom, to the office meeting or waiting room. This DeWitt chair with dowel base is true to the original specifications, crafted from a durable polypropylene plastic shell that offers a more affordable alternative to fiberglass, with slightly more flex. The shell seat sits on solid wood dowel legs with Eiffel-style polished stainless steel bracing for additional stability, and plastic feet runners to protect flooring surfaces from

scratching. If you have a specific requirement for a project, we're happy to help. Please contact one of our professionals to discuss your requirements.
