Albany | Prouve Stool - Walnut

\$388.00

Description

Albany | Prouve Stool - Walnut

With its seat reminiscent of a 1950's school chair, this curious barstool is both a delight from a design perspective as well as practical in function. A mid-century design that is both classic and modern, comfortable and simple. Originally designed by Jean Prouy, a French designer-engineer, this inspired stool is inspired by the Prouy Standard Chair. It's an inviting seat engineered with not only style in mind but performance.

Features & Benefits

- Expert engineering allows the stool to take the rigors of high traffic residential and commercial spaces and continuous daily use.
- Classic finishes of walnut wood seat and black metal fits many decors.
- A design that is both classic and modern allows for melding into many style spaces from minimalist to eclectic.
- Can be paired with a metal and wood counter height pub table or glass top table with metal base.
- Overall dimensions measure W16.5" | L15.5" | Overall Height 39.5" | Seat height: 26.5" | Backrest Height: 14.5"

Masterful Replication

Inspired by Prouy's original creation, we replicated the expert craftsmanship and authenticity with our Willet Barstool. This expertly-engineered stool features the same look and design attributes as Prouy's. In addition to using daily in your most oft-used spaces like the kitchen island or low pub table, you'll enjoy showing off this stool as a conversation piece in your home.

Expertly Engineered

Stools and chairs take the most strain on their back legs, where they bear the weight of their user's upper body. Prouy took this into account very succinctly when designing his standard seating, and our stool follows suit. Tubular steel piping is enough for the front legs that take relatively little strain, whereas the back legs are made of voluminous hollow sections and pass the strain on to the floor. The result? A stool that can stand up to the rigors of high traffic residential and commercial spaces and continuous daily use.

Classic Wood & Metal Finishes

The stool features a classic combination of finishes to meld with many decors from eclectic to modern. A fine Natural finish on bentwood waterfall seat and back is supported by black finished metal frame. An alternate Walnut with black metal version is available.

Attainable Design

This stool reproduction allows you to own and enjoy a classic modern icon without foregoing quality. We understand not everyone has ample means by which to attain such a piece. With that in mind, we offer our masterful rendition of Willet Barstool made with high-quality materials and careful craftsmanship at a modest price point. Among other such seating, the materials and expertise used to create our products are top quality.

About the Designer

Modern engineer-designer Jean Prouy trained as an engineer early on but chose to explore other design-focused projects ultimately. This led him to create a very practical and respectable portfolio of designs from letter openers to buildings. Prior to engineering school, he trained and worked as a metalsmith which the skills he garnered would later become invaluable as he created his coveted chair, table and lamp designs. In addition to his Prouy Standard Chair, the engineer-designer is known for his Potence Lamp, EM Table and Standard SP Chair.

Special Care Instructions

To clean the metal elements, avoid use of harsh acidic or abrasive cleaning solutions. Use damp soapy sponge or cloth for general clean-up. For cleaning and maintenance of wood, use a soft dry cloth to dust if needed. For spills, use a damp soapy sponge or cloth.
